# HOW-TO DETECT "THE GLOW"

**80%** of the time parents or family members are the first to notice "The Glow."

# Find several photos of your child that are:

#### > UNCORRECTED:

If the photo is red-eye retouched, existing Leukocoria may not be visible.

#### HEAD-ON:

Find photos where your child is looking directly at the camera.

#### FLASH PHOTOS:

Choose photos taken using flash photography.

## **Review photos for "The Glow."**

Look for either a white or golden yellow pupil. Look to see "the Glow" consistently in one eye. The glimmer of Leukocoria can sometimes look like a cat's eye reflection.

### If you see "The Glow" once, be alert. If you see it twice, be active.

Early detection and parental action can help save your child's sight. For more information visit www.knowtheglow.org
