

HOW-TO DETECT “THE GLOW”

80% of the time parents or family members are the first to notice “The Glow.”

① Find several photos of your child that are:

 **UNCORRECTED:**
If the photo is red-eye retouched, existing Leukocoria may not be visible.

 **HEAD-ON:**
Find photos where your child is looking directly at the camera.

 **FLASH PHOTOS:**
Choose photos taken using flash photography.

② Review photos for “The Glow.”

Look for either a white or golden yellow pupil. Look to see “the Glow” consistently in one eye. The glimmer of Leukocoria can sometimes look like a cat’s eye reflection.

③ Si ves “El destello” una vez, mantente atento; si lo ves dos veces, acude con tu médico

Early detection and parental action can help save your child’s sight. For more information visit www.knowtheglow.org
